Breaking News! WOAI 4, KENS 5, and KSAT 12 all report below average temperatures expected for July!

Sorry, just kidding. It’s summertime, and honestly, could our South Texas weather forecasters be that wrong? While the average weather forecaster gets it right just under 80% of the time, the chances of getting a South Texas July weather forecast wrong are slim and none - it’s always hot. I believe Chantal Drehel’s Rhode Island Red hen (“Little Red”) could get at least 80% of our July forecasts correct. Can you see her pecking out --- “It was hot yesterday --- it will be hot today --- oh and by the way, it will be hot tomorrow.” (You may remember that Chantal’s Rhode Island Red won the 2016 Independence Day ribbon for “Most Patriotic.”)

Please do not think that I am disparaging our exemplary weather forecasters - Albert Flores, Bill Taylor, and Steve Browne (all great guys). Not only do they deliver spot-on weather forecasts, but they are also active community members blessing us with their service.

Over the years, I have specifically enjoyed watching Bill Taylor both on TV and about the area. In his younger years, I can remember attending galas where the ladies among us (young and old alike) would nearly swoon in his presence. Super guy (and certainly above 80% right on weather forecasts), but I sincerely ask you, how can you get paid in a field known for being wrong 20% of the time?

Who in their right mind would listen to a doctor wrong 20% of the time, or picture an attorney wrong 20% of the time, and imagine your HEB cashier wrong 20% of the time? Personally, the only other group we pay to be wrong soooo often are our politicians, but then again, what if we selected our weather forecasters based on what they promise as opposed to what they deliver? Can you say, 60-degree July mornings every day?

Do you ever wonder why Bill and the guys even issue such predictable July weather reports? Perhaps they are concerned about other competition, like “The Old Farmer’s Almanac”. After all, the Almanac promises us a summer that is “cooler than normal, on average, with rainfall above normal in the north and near normal in the south.” Now, this is a forecast we can live with.

Don’t you love the words, “cooler than normal”? Do they conjure up childhood memories of evenings watching shooting stars, sipping an ice-cold Frostie Root Beer and chasing lightning bugs? Or travelling from here to Timbuktu, pedal to the metal, windows rolled down with the smallest child stuffed into the back of the family station wagon? Or stopping by relatives for quick refreshments, all while dad eagerly taps his watch as he says something like, “we need to go another gazillion miles before nightfall”?  

(Continued on page 2)
Such summertime memories are some of the best of our lives. The good news is that memories like those await us each evening! The only question is which memories do we create?

As the evening heat falls to a manageable level, will we crank up the AC, bring in the pets, and pour a cold one? That sounds like a good plan, and even a mediocre weather forecaster could get that one right more than 80% of the time.

Or, do we sit under the stars with our feet in a cool backyard pool or pond? Look to the heavens for the next shooting star? Sip on an ice-cold Frostie Root Beer? Hold hands with a loved one? Remember younger years of chasing lightning bugs across the yard (or even better, watch a young one chase lighting bugs across the yard)?

This summer offers each of us richness only limited by imagination. Please consider embracing the richness of summer in our community - such as our community’s July 1 party, neighborhood barbecues and the like. A lifetime of remembrances awaits all, and each passing evening presents previously unexplored opportunities for wit, wisdom and love with family, friends and neighbors.

As our community begins the annual budget cycle, I wish each of you a wonderful Independence Day and summer to remember on behalf of our Council, City Manager and staff.

If you ever have any questions, comments or concerns about our community, I hope to hear from you. Please give me a call at 210-867-0441.

Robert Werner, Mayor

Helping our Seniors, LLC
Keeping our Seniors at Home & Independent

Let us help you!
We provide affordable non-medical care and companionship for seniors who want to stay in their own homes.

Services include:
- Meal planning/preparation
- Grocery shopping
- Transportation to outings & appointments (min. required)
- Light housekeeping/laundry
- Medication reminders
- Daycare, overnight, or 24-hour care

Municipal Court hours of operation are:
Monday through Friday from
8:00 am to 4:00 pm
Town plans express a shared community vision to guide public and private initiatives and investment related to future growth, development, and land preservation.

A plan should clearly express how the community intends to accomplish priority objectives related to transportation, infrastructure, conservation, resiliency, and fiscal management. In September 2010, Shavano Park adopted a “Town Plan”, which, “set forth general goals and objectives stating our collective vision for the future.”

The Town Plan provided “a foundation for the City’s long-term growth and development with long-range public policy statements for implementation” over future years. The Town Plan presented “goals for various aspects of our City, including developing the municipal tract, managing street usage, adding hike and bike trails, developing raw land, and planning for the City’s long-term financial stability.”

The plan also provided provisions for a periodic plan review process to amend the plan. A lot has been accomplished since 2010 and it is time to reflect those changes by updating the Plan. At the March 27, 2017 City Council meeting, Council approved an action to update and revise the Town Plan. The action approved was “to adopt a comprehensive plan by an amending ordinance and following City Council and Planning & Zoning hearings, a Town Plan for 2017 and future years.”

In April, the Planning and Zoning Chairman, Mike Janssen, presented City Council with a proposed plan for updating the Town Plan with the initial concept of holding a series of public hearings on the major sections of the plan over several months.

A projected schedule for the Town Plan Public Hearings is outlined below (topics are subject to change).

**PLANNING & ZONING PROPOSED SCHEDULE FOR TOWN HALL MEETINGS:**

- July 12th – City’s Vision, Goals & Objectives, Issues & Opportunities and Open forum for new topics from residents
- August 2nd – Hike & Bike Trails / Review of current status - Denton semi-Annual development
- September 6th – Residential and Commercial Development / Review of KFW Drainage Study
- October 4th – Flooding & Drainage
- November 1st – Municipal Tract / Update on the TxDOT NW Mil Hwy improvement project
- December 6st – NW Military Highway

Your attendance and input to the Public Hearing is needed. The City will establish a resource site on our website to assist citizens with the work in progress. More information to be published as it is developed.

CHIPPER DAY

Shavano Park Fire Department in conjunction with the Firewise program will be hosting a Chipper Day. This event will allow resident to bring brush and yard debris to the Shavano Park Fire Department for chipping and disposal. This is a perfect opportunity to clean brush and undergrowth from your yards while helping to prevent the spread of wildfires.

This event will be on August 19th, 2017 between 9am and noon. The chipper will be located in the parking lot in front of Public Works. No material larger than 4” will be accepted.

Please contact Chief Michael Naughton at 210-492-1111 if you have any questions.

PIE BAKING CONTEST
TWO CATEGORIES:
Traditional & Non-Traditional

All pies must be homemade. Traditional is apple pie; non-traditional is whatever you’d like.

4. PRIZE CATEGORIES: 13 & under, traditional; 13 & under, non-traditional; 14 & over, traditional; 14 & over, non-traditional

PRIZES: 3 prizes in each category, 3-panel judge will select winners.

Visit shavanopark.org to read the rules and print an entry form, or you may pick up a copy of the form at City Hall.

Reminder

As a community, we want to celebrate all of our graduates. So that we can collectively celebrate the high school and secondary education graduates in our August Roadrunner, I ask you to call Zina at City Hall (210-493-3478). Please provide her your high school and/or secondary education graduate’s name, school, future education or other plans as well as any degrees achieved.

Robert Werner
Mayor
This report is intended to provide you with important information about your drinking water and the efforts made by the water system to provide safe drinking water. For more information regarding this report contact:
Name  Brandon Peterson, Public Works Director
Phone  (210) 492-2841
Este reporte incluye información importante sobre el agua para tomar. Para asistencia en español, favor de llamar al teléfono (210) 493-3478.

CITY OF SHAVANO PARK is Ground Water

Sources of Drinking Water
The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Our water is coming from the Edwards Aquifer, and the Trinity Aquifer. All samples collected were within TCEQ standards and there was no violation.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA’s Safe Drinking Water Hotline at (800) 426-4791.

Contaminants that may be present in source water include:
• Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
• Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic waste water discharges, oil and gas production, mining, or farming.
• Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
• Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production and can also come from gas stations, urban storm water runoff, and septic systems.
• Radioactive contaminants, which can be natural - occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Contaminants may be found in drinking water that may cause taste, color, or odor problems. These types of problems are not necessarily causes for health concerns. For more information on taste, odor, or color of drinking water, please contact Brandon Peterson, Public Works Director at (210) 492-2841.

You may be more vulnerable than the general population to certain microbial contaminants, such as Cryptosporidium, in drinking water. Infants, some elderly, or immunocompromised persons such as those undergoing chemotherapy for cancer; persons who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders, can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care providers. Additional guidelines on appropriate means to lessen the risk of infection by Cryptosporidium are available from the Safe Drinking Water Hotline (800-426-4791).
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We are responsible for providing high quality drinking water, but we cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

**Information about Source Water Assessments**

The TCEQ completed an assessment of our source water and results indicate that some of your sources are susceptible to certain contaminants. The sampling requirements for our water system are based on this susceptibility and previous sample data. Any detections of these contaminants may be found in this Consumer Confidence Report. This information describes the susceptibility and types of constituents that may come into contact with your drinking water source based on human activities and natural conditions. The information contained in the assessment allows us to focus source water protection strategies.

For more information about your sources of water, please refer to the Source Water Assessment Viewer available at the following URL: http://gis3.tceq.state.tx.us/swav/Controller/index.jsp?wtrsrc=

Further details about sources and source-water assessments are available in Drinking Water Watch at the following URL: http://www.tceq.texas.gov/DWW

**2016 Regulated Contaminants Detected**

**Lead and Copper**

**Definitions:**

- **Action Level Goal (ALG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. ALGs allow for a margin of safety.
- **Action Level:** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**cont’d on page 8**
Water Quality Test Results

Definitions:

- **Def: Regulatory compliance with some MCLs are based on running annual average of monthly samples.**
- **Maximum Contaminant Level or MCL:** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- **Level 1 Assessment:** A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.
- **Maximum Contaminant Level Goal or MCLG:** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **Level 2 Assessment:** A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.
- **Maximum residual disinfectant level or MRDL:** The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- **Maximum residual disinfectant level goal or MRDLG:** The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Water Loss for 2016

In the Water Loss Audit submitted to the Texas Water Development Board for the time period of January 1st – December 31st, 2016 our system lost an estimated 8,776,136 gallons of water which equates to approximately 5.32% of our water pumped for the year. If you have any questions about the water loss audit please call Brandon Peterson at (210) 492-2841 or you can contact the Texas Water Development Board at (512) 463-7847.

If you have questions concerning this CCR, please call the Drinking Water Quality Team at (512) 239-4691 or email PWSCCR@tceq.texas.gov. Make sure you have the water system name – City of Shavano Park and the ID # – 0150092.

Hardness of water in Shavano Park does not have fluoride as an additive.
Bentley Manor Dining Out Group

by Marylin Berrier

What a wonderful evening is planned for our Dining Out Group on Saturday, July 15! Details of the evening will be emailed to all members. July will be co-hosted by Paula & Steve Peters and Barb and Sam Bowker. Please note our reserved room for dinner is limited to 40 members. Make your reservations early! All members are welcome to join us for Happy Hour at the Peters’ home!

Our membership is open to residents of Bentley Manor... couples and individuals... interested in socializing with neighbors and dining at area restaurants. Come when your calendar permits. Members take turns volunteering as hosts, providing simple appetizers and drinks at their home, followed by dinner at a restaurant selected by hosts. Come and enjoy the fellowship and meet your Bentley neighbors.

For more information on our group, details of our next event or to add your name to the membership list, contact Marylin Berrier, Dining Out Group Coordinator, 286.8833 or marylinberrier@gmail.com.

Hypoxylon Canker in Local Oak Trees

By Randy Smith, Chairman Tree Committee

Many ailments can cause oak trees to die within our urban landscape, the most well-known and serious pathogen being oak wilt. However, not all oak trees that die within our community are the result of oak wilt. Natural and man-caused factors can weaken a tree include defoliation by insects or leaf fungi, saturated soil, fill dirt, soil compaction, excavation in the root zone of the tree, removal of top soil under the tree, disease, herbicide injury, drought, heat, nutrient deficiencies, competition or overcrowding, and other factors.

Hypoxylon Canker has been noted in the death of many oaks in Texas recently, most noticeably the Post Oak variety. This fungus disease is first apparent as a dieback of one or more branches, with the foliage on the diseased turning yellow and dry. The dieback will continue to spread branch by branch until the tree eventually dies. When near death, the outer bark of the tree will slough off, leaving brown or black fungus covered patches. Hypoxylon canker occurs primarily on trees which are or have been in stressed conditions. Trees in which roots have been damaged by excessive fill soil or construction traffic are specifically susceptible to this fungus. Once a tree has been infected, there is no known effective treatment.

Control and prevention of this disease is best achieved by maintaining trees in healthy conditions and never applying fill soil around the trees.
Household Hazardous Waste Pickup Program

Do you have used motor oil in your home? Used batteries? Old paint?

There is a convenient service offered in by Bexar County for Shavano Park that allows you to properly dispose and recycle home-generated special materials- safely, easily and responsibly. These items may include paints, spray paint, wood stain, household cleaners, compact fluorescent lamps (CFL), automotive products, gasoline, antifreeze, pesticide, insecticide, household and vehicle batteries and more. These hazardous materials can be conveniently picked up at your home by simply scheduling a collection.

- Aerosols
- Antifreeze
- Automotive chemicals
- Batteries
- (Household AA, C, D, auto, hearing aid, etc.)
- Chlorine bleach
- Cleaners
- Corrosive chemicals
- Drain openers
- Fluorescent tubes
- Gasoline
- Herbicides
- Hobby chemicals
- Lubricants
- Paint and Paint Products
- Pesticides
- Rust Removers
- Used motor oil/filters
- ...and much more!

Unacceptable HHW Wastes

- Ammunition
- Biological waste
- Commercial chemicals
- Containers over 5 gallons
- Explosives
- Fire extinguishers
- Gas cylinders
- Radioactive materials
- Unknown or unlabeled items

For a complete list of acceptable items, program guidelines and to schedule a FREE home collection:

Go to: WMATYOURDOOR.COM
Call: 1-800-449-7587
Email: ATYOURDOOR@WM.COM

For qualified residents of suburban cities and unincorporated Bexar County only.

Neighborhood WATCH News

Neighborhood WATCH Partners with Law Enforcement for a Safe Community

TAKE A STAND AGAINST CRIME – Join Neighborhood WATCH

Submitted by Etta Fanning, Coordinator Neighborhood WATCH

Yes, Shavano Park does have an active Neighborhood WATCH program with Block Captains for the different areas of Shavano Park. It’s simple to get involved.

Our Neighborhood Watch Program promotes “Neighbors Helping Neighbors.” We watch out for each other and share information. We know when something is ‘not right’ in our own neighborhood and report all those suspicious activities to the Shavano Park Police at the non-emergency dispatch number—210-804-0110 or the emergency number 911, if you cannot reach dispatch.

Let’s work together to keep Shavano Park safe! Please share this information with your friends and neighbors.

Neighbors Helping Neighbors

Have a safe July 4 celebrating America. To join Neighborhood WATCH, contact Etta Fanning, fanninge@satx.rr.com/ Cell/text: 210-722-4452.

Neighborhood WATCH is an organized group of volunteers who agree together to keep an observant eye on the neighborhood, and to report any suspicious activity to 911. Neighborhood WATCH is registered with National Neighborhood WATCH - a division of the National Sheriffs’ Association.

BUDGET AWARD

(Chicago,Illinois) — Government Finance Officers Association is pleased to announce that City of Shavano Park, Texas has received GFOA’s Distinguished Budget Presentation Award for its budget.

The award represents a significant achievement by the entity. It reflects the commitment of the governing body and staff to meeting the highest principles of governmental budgeting. In order to receive the budget award, the entity had to satisfy nationally recognized guidelines for effective budget presentation. These guidelines are designed to assess how well an entity’s budget serves as:

• a policy document
• a financial plan
• an operations guidelines communications device

Budget documents must be rated “proficient” in all four categories, and in the fourteen mandatory criteria within those categories, to receive the award.

When a Distinguished Budget Presentation Award is granted to an entity, a Certificate of Recognition for Budget Presentation is also presented to the individual(s) or department designated as being primarily responsible for having achieved the award. This has been presented to Lara Feagins, Finance Director.

There are over 1,600 participants in the Budget Awards Program. The most recent Budget Award recipients, along with their corresponding budget documents, are posted quarterly on GFOA’s website. Award recipients have pioneered efforts to improve the quality of budgeting and provide an excellent example for other governments throughout North America.

Government Finance Officers Association is a major professional association servicing the needs of more than 19,000 appointed and elected local, state, and provincial-level government officials and other finance practitioners. It provides top quality publications, training programs, services, and products designed to enhance the skills and performance of those responsible for government finance policy and management. The association is headquartered in Chicago, Illinois, with offices in Washington D.C.

LOOKING FORWARD TO NEW YEAR

The Welfare Café and Goat Farm was the perfect spot for our last meeting of the year in May. This unique spot in the hill country served a delicious lunch in a lovely rustic setting on a drippy rainy day. The weather didn’t bother anyone as all were busy catching up on the latest news and enjoying the surroundings. No goats were harmed, invited or even seen during this fun outing.

Mary Werner officiated at a very meaningful installation ceremony for officers who will serve for the upcoming 2017-2018 fiscal year which began June 1, 2107. Maggi Kautz will continue as President and Kit Fuller will continue as Vice President. Paula Peters will serve as Secretary, Alma Saenz as Treasurer and Elfie Palmer will continue as Parliamentarian. Program planning for the New Year is in the works and it looks like another exciting year is ahead.

Later in May SPWC members joined the Lunch Bunch ladies at the McNay Museum for a private tour of their special exhibit Monet to Matisse: A Century of French Moderns. Our own SPWC member, Diane Smilgen, a seasoned docent at the McNay, lead one of our groups. After the tour we journeyed a few blocks down Austin Hwy to enjoy a great lunch at Silo Elevated Cuisine. A fabulous end to a fabulous day!

We are currently collecting membership dues for the Shavano Park Women's Club so we can get started on our directory the new year. Send your check for $20.00 to Alma Saenz, 4407 Yorkshire Court, 78249. Be sure to include your name, address, telephone number for inclusion in the SPWC Directory, along with e-mail address for notification purposes. We are starting on the Directory now, so be sure to get you information and check mailed soon. If you have any questions please call Maggi Kautz at 210-408-7050.
